

Observer Name:		Date:	Sunrise Time:	Start Time:
Point ID:	Latitude:		Longitude:	Temperature:
Cloud Cover %:	Wind	d Code 0-3:	Noise Code 0-3:	Replication 1-2:

Points to remember:

- Make sure you know how to find listening point in the dark. Prior to the field, record OBSERVER NAME, DATE, SUNRISE TIME & POINT ID.
- Collect data 45 minutes before sunrise to 15 minutes after sunrise. Record actual START TIME.
- 3. Weather: Do not collect data if it is raining or snowing (fog is fine). Favorable wind speed is <4 mph, cloud cover <75%
- 4. On covey location field map record location of each calling covey with an X, along with TIME DETECTED and COVEY ID.
- 5. Codes:

Wind Codes:

0=0 mph/still 1=1-3mph/wind shown by smoke drift 2=4-7mph/wind felt on face, leaves rustle 3=8-12mph/leaves in constant motion

Noise Codes:

0=silent 1=distant noise not interfering 2=at times difficult to hear 3=constant noise, hard to hear

Covey ID	Confidence in Covey Location Estimation High, Medium, or Low	Time Detected	Quail in Covey #	Confidence in Quail Counted High, Medium, or Low
